

GIS4Schools

IES MARC FERRER

OBJECTIVES

- ❖ Improving STEAM skills in secondary schools is the main goal of the Erasmus + funded project "GIS4Schools", which started in September 2020 and will end in June 2023, but with the intention of lasting beyond the set time.
- ❖
- ❖ Introduce students to the use of GIS (Geographic Information System) technology
- ❖
- ❖ Apply knowledge for the study of climate change in local communities. In our case, Formentera.

Who participates

2 classes of 4th year of
Compulsory Secondary Education
(ESO)- From 15-16 years.

34 students in total.

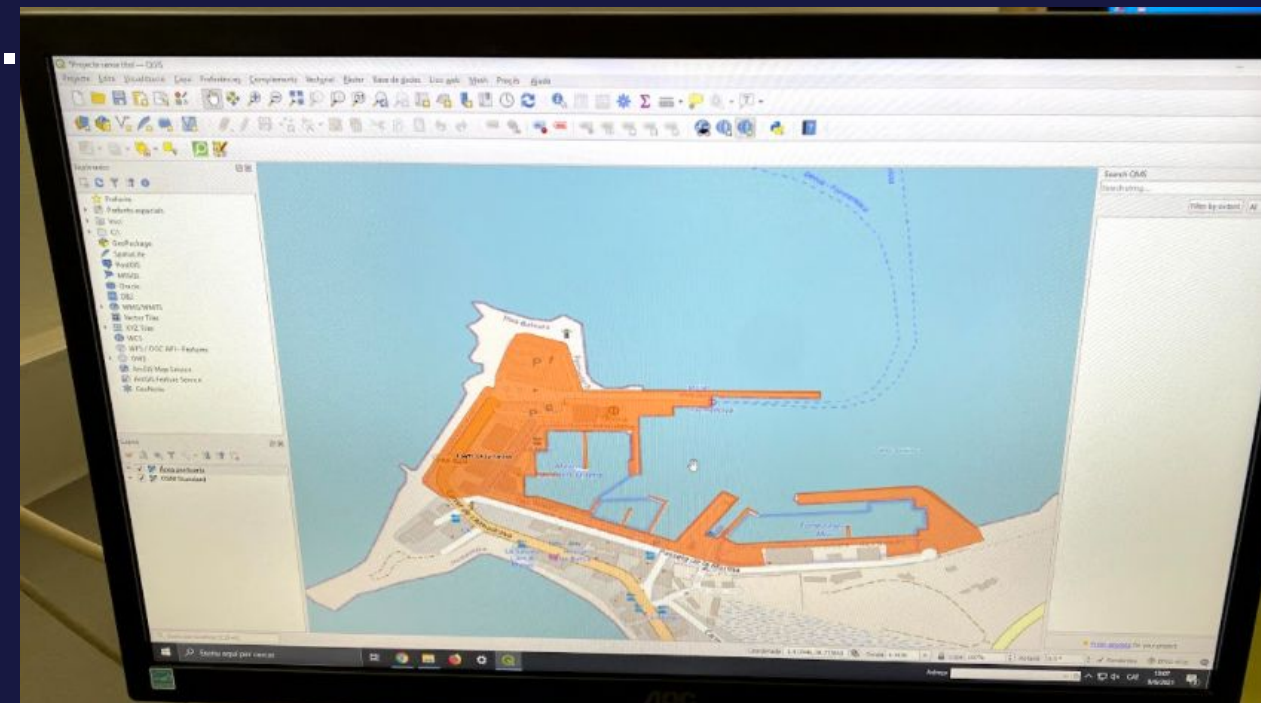

6 teachers in total - (Geology,
Mathematics, Biology and Physics)

Sessions

In total we have done 8 sessions.
3 more theoretical and 5 practical.

We start with more general sessions and
finish the last 3 practices working with GIS
with local examples.

OUR PROJECT

- ❖ We have not yet defined the final objective of our project. But we have discussed several ideas.
- ❖ Like the study of water temperature. Its evolution and consequences.
- ❖ The rise of the sea and its consequences.

Thank you!
